

# TalkToStellar

## AI-Native Global Financial Assistant

TalkToStellar is building the next generation of global payments: a conversational financial assistant that makes international money movement feel as simple as sending a message.

---

### Vision

Move from “crypto wallet” and “transfer app” to an invisible global account powered by AI, conversational UX, and intelligent financial context.

### Core Product Experience

- WhatsApp/Telegram-style conversational payments
- Pix → USD global transfers with intelligent routing
- AI-powered payment memory and smart contacts
- Live savings comparison vs traditional banks
- Premium receipts and transaction journeys
- Shareable global profiles and payment links
- Context-aware financial insights and activity feed
- Invisible FX conversion and frictionless onboarding

### What Makes It Different

Unlike traditional fintech apps, TalkToStellar focuses on making money feel intelligent, contextual, and emotionally understandable. Every transaction becomes a meaningful experience with live status, savings visibility, smart insights, and conversational interaction.

### Positioning

“The AI-native global financial assistant.”

Wise × Nubank × ChatGPT for international money movement.
